## Organizational Security Package (OSP)

**Onboarding Guide** 

Create multiple Altium 365 Workspaces with unlimited data storage. Enhance access controls through IP whitelisting, groups, workspace management, Security Information and Event Management (SIEM) API, and your existing Single Sign-On (SSO). Maximize efficiency and gain better project visibility with Jira integration and Design Reviews, and add functionality with apps.

## **Getting Started**

ONBOARDING OBJECTIVES	RESOURCE
Create Multiple Workspaces	Documentation Article
Configure Advanced Workspace Controls	Documentation Article
Manage Groups	Documentation Article
Perform Design Reviews	Documentation Article
Configure Jira Integration	Onboarding Guide
Configure Single Sign On (SSO)	Documentation Article
Configure IP Whitelisting	Documentation Article
Configure Security Information and Event Management (SIEM) API Integration	Documentation Article

## **Best Practices**

- Create multiple workspaces when teams or data need to be kept separate.
- Enable SSO, IP Whitelisting, and SIEM integration for stronger security measures.
- Disable other authentication methods after setting up Single Sign On (SSO).
- · Assign Workspace members to Groups to simplify control over sharing and operating permissions.
